Disclaimer

The document here is proprietary material of i9 innovations and Educations Pvt Ltd. This is prepared solely for the purpose of information to relevant users and clients mainly about our flagship product The Super Dr. By accessing this document you agree to maintain strict confidentiality regarding its model and also the content. Disclosure or sharing of the same to any person / Agency, whom i9 innovations would deem to be its competitor, would be considered a violation of this confidentiality.

ABOUT

i9 Innovations & educations Pvt Ltd is an Educational, Networking, and IT Solutions Company for Healthcare and its related industries, offering consultancy, professionally managed services, and software development. We have a reputation of excellence in supporting and serving our customers and users. We research & provide the optimum solution to meet your operational needs, using an in-house consultancy expertise, and software development. We create perfectly tailored scalable systems, and support services for every Healthcare organization as per their needs.

We also excel in providing IT support, trained technical Man-power, Onsite Staff, Administrative skills development program, in addition to project management, strategic, and business solutions, integrated into the client's business processes. Our core speciality is to provide latest Web technologies, Mobile and Tab applications, On Android as well as iOS platforms. To all healthcare sectors such as clinics, health centers, laboratories, pharmacies, pharmaceutical industries, Research centers, State & Municipal Administration etc.

OUR TEAM

Our Medical researchers have achieved remarkable progress in the healthcare industry past 14 years and are evident in the healthcare indices, which are provided in every corner of our application the Super Dr. This achievement was hailed by many observers and is the outcome of dedicated services and performances, consistently in the field of Health care.

What is needed is a scientific cum digital approach, to the management of the patient records, with a particular protocol and not miss important aspects of healthcare. There are a lot of avoidable human errors, which we identify & offer corrective measures. It's our moral responsibility to maintain the health of society which is fast deteriorating due to communicable as well as non-communicable diseases.

OUR TEAM

Transformation

The changes brought about by Super Dr systems will be fundamental with long-lasting effects. There will also be a great deal of process re-engineering as well. The public healthcare system will undergo an unprecedented transformation, and will no more have the old and outdated mode of communication between the doctor the patient and the administration.

Application Development

The single largest component of this project is the software application. This process will adopt the most agile programming method where the developer and the user will be involved fully throughout the development cycle or implementation of the Super Dr.

OUR TEAM

Development

Our team at i9 innovations comprises young doctors and experienced Super specialist consultants. All IT personnel have a fair Healthcare background adding to it para medical staff were drawn in from the industry. This team will eventually take over the system once fully functional. The team will also be instrumental in various aspects of technology, Database administration, System administration, Protocol management etc.

Support

Our support team is a group of Doctors Para-medicals and software experts from various wings of the Health industry. They are a part of application development and this team will be solely responsible for the smooth process management as well as timely upgrades and updates to the software.

INTEGRITY & CREDIBILITY

We conduct ourselves with uncompromising integrity and honesty as individuals, as teams, and as a company. We strive to earn enduring credibility with others, which we believe is essential to long-term personal and business relationships. We design products that are frugal and easily accepted by the masses. There by cutting the cost of technology so that everyone is able to participate in the innovations.

INTEGRITY & CREDIBILITY

- Cultivate integrity & credibility be worthy of belief.
- Remember the fragile nature of credibility, it takes time to build and moments to lose.
- Do what you say you will do, & always follow through.
- Be responsive - work on end-user feedback to optimize overall effective service in a timely way.
- Communicate status and decisions - openly, and in a timely manner.
- To be authentic, genuine, and true to yourself - so that people take you at face value.
- Listen - seek first to understand end-user experience and optimize our services based on it.
- Talent will be useless without training and Practice.
- We stand up for what we believe in and are willing to put ourselves on the line.
- Always put values ahead of short term gains.
- Tell the whole truth - deliver the complete message.

Customer Focus

The one single largest component of this project is the software application. This process will adopt the most agile programming method where in the developer and the user both will be involved full throughout the development cycle. The end user experience is the most important aspect of the entire development.

Excellence

We believe, Excellence is best described as doing the right things right, every time. Improving the previous effort by selecting the most important things to be done and then accomplishing them 100% correctly.

Our Mission

To connect doctors, allied services, and patients to derive credible and accurate healthcare services which go a long way at not only saving lives, but also deliver a superior quality healthcare, which patients & physicians can recommend to each other and create an ecosystem within the country for rapid expansion of health care services across the length and breadth of our country.

Our Vision

To be the pioneer in connecting doctors, allied services, and patients to derive credible and accurate healthcare services which will go a long way at not only saving lives but also creating an ecosystem within the country for rapid expansion of healthcare services across the length and breadth of our country, and later become a world leader in connecting Healthcare infrastructure, improve the patient-doctor experience, for greater research protection and development of care.

Giving back to Society

We believe in giving back to the society is the highest expression of potency. In the very act of giving, we experience our strength. Remember our beginning, encourage the beginners, try and erase shortcomings ourselves instead of complains. Our wealth which empowers us to strive forward was not always ours or neither will be. This experience of heightened vitality and potency fills us with joy. We experience ourselves as overflowing, spending, alive, and hence joyous. Giving is more joyous than receiving, not because it is a deprivation, but because in the act of giving lies the expression of our aliveness.

Why Digital ?

- Facilitate quality & accuracy to the masses & needy.
- Provide a single platform across all the facilities.
- Traditional platforms are long outdated.
- To harness the full potential of a healthcare provider.
- To have an error free communications within the platform.
- Achieve high levels of transparency & TAT.
- Collate data for any epidemic or pandemic, preparedness & disaster management.

Convenience of an Ecosystems.

- Common Registration for every Indian.
- Free EHR facility
- A unique Super Dr PIN .
- To access & be accessible.
- Freedom to consult Doctor anytime anywhere.
- Freedom to avail a digital report anywhere via Cloud s

Hospital Operations

- Intelligent paperless OPD and IPD based on templates,
- Alerts & AI based suggestion at critical checkpoints.
- High levels of treatment accuracy .
- TAT for analysis & Quality management.
- NABH quality markers and registers.
- Digital one touch IPD
- One touch OPD
- Queue management
- Integrated Path Lab & Radiology equipments.
- Dashboard for quick Management.
- Easy locators, Notifications.
- Error free secured and digitally communications.
- Real time Data for faster diagnosis & Treatments.
- iCD 10 enabled NABH Compliant.
- No additional staff for Quality control.
- Instant start.
- Any device.
- Smart Theater.
- Automated Billing systems.
- 2 hours of training only.

DATA SECURITY

Data Security:

Our products are designed and implemented for the highest level of data security, such as GDPR or HIPAA, or such equivalent standards. We strive to achieve it real time testing for almost a year before launch.

Data and Application Interoperability:

You can have a robust and easily connected HMIS and PACS with your national and international information exchange that specialize in health data. Our products are therefore compliant and certified with world class interoperability's standards, such as, FHIR APIs and IHE profiles meant for health information exchange based data and application integrations by design.

Patient Privacy and Safety Compliance:

Patient health data management is a very critical and legal business. Every compliance related to patient's health information including privacy norms and active clinical decision support at the point of care for patient's safety is demonstrable and delivered as an integral part of the handover.

Data visualization and Analytics:

The Super Dr and other products have a sophisticated data warehousing and mining capability. We have a proven track record of evolving enterprise Data analytics and visualization skills and its demonstrable for eventual implementations.

Forwarding information

Technology is a key enabler. It provides Healthcare professionals with the right information, at the right time, in the right way to get the job done. At I9, our accurate and experienced approach provides expert advice and services to deliver technology that will grow and flex with you.

Enabling technology, supporting people

i9 innovations was established in the year 2014, with a vision to create an IT company exclusively for Healthcare providers that delivered on the promise of providing a superior and proactive patient experience. Qualified professionals were further trained and updated to meet the technological advancements happening around the world in the Healthcare Sector. Super specialist Medicos from various faculties joined hands to create an environment that took Healthcare services to a next level. So that India can be ready to become the next healthcare destination for the world.

Quality and consistency

We have strict processes in place across the organization to ensure that we follow best practices in all customer interactions. The Super Dr application and the platform were conceptualized to enhance and harness the full potential of the Doctors, nurses, and technicians, cutting down the communicational errors and saving their time from clerical work, and unnecessary wastage of writing the same templates time and again.

Let's now change what can be changed as early as possible. Let's set an example for the generations to follow. Let's just not talk of saving trees, let us be a part of the Green Revolution.

INTRODUCING

Super Dr is India's first and most comprehensive ecosystem dedicated to making healthcare services simpler, accurate and credible for everyone. Our mission is to connect doctors, allied services and patients to drive credible and accurate health care services which go a long way at not only saving lives but also to create an ecosystem within the country for rapid expansion of health care services across the length & breadth of our country. We are young as an organization but backed up by seasoned professionals from the health care sector. We aim to pioneer an innovative, free, cloud-based model for patients to store, share and consult health care professionals. Our processes are in a constant state of transformation to incorporate the latest advancements in healthcare facilities in our ecosystem of services.

THE ECOSYSTEM

Super Dr's platform connects the complex ecosystem of medical professionals, patients, labs, billers, imaging centers and life science partners. Healthcare partners connect with our community of medical professionals about services that streamline their daily practice, allowing them to focus on delivering value-based care and drive better patient outcomes.

Our real-time clinical software would grow to become the first, largest and most accurate clinical dataset in the India. From identifying disease outbreaks to tracking Meaningful Use progress, Super Dr's clinical research team is dedicated to helping independent medical practices deliver better, safer and more efficient care.

THE FEATURES

- A much-needed Hospital Networking Platform (HNP)
- Reduced transitional errors in medical practice.
- Reduced diagnostic and treatment time.
- Geographic monitoring of disease outbreak.
- Healthy baby, healthy society.
- Mobile applications for all involved.
- A great UI UX for reluctant users.
- Huge savings/month
- Good earnings through Super Dr
- NABH enablement.
- Clinical Database.
- Machine interfacing
- PACS
- Treatment Schedule, alerts and analysis.
- Easy locators for Blood banks, Ambulances and allied services.
- Technology enablement to make healthcare affordable & easily available.

KEY FEATURES

Charting

Super Dr. is India's first professionally developed Consultation application available to doctors and hospitals. The availability of customized templates makes it easy for Doctors to start by simply selecting a template from our library. With intuitive note assists, doctors can save precious time while Consultation. Availability over mobiles and tablets makes the entire process very dynamic with the ability to review and record details on the go. The Doctors now can never miss an important history of the patient as they can see it in a glance and also help by suggesting preventive care using the dynamic attach-template inbuilt with Super Dr.

E prescription

Prescribing a medicine and at the same time storing it in your own database was never possible until now. Doctors can start e prescriptions in a jiffy with Super Dr. and can set their own favorites in prescriptions which can be recalled by a single click. Set up drug-drug and drug-allergy interaction checks to improve accuracy and help prevent interactions. Set up minimum and maximum dosage of a particular medicine once and create an error message for future.

KEY FEATURES

Labs and Imaging

Request for a test will now be available in the lab even before the patient reaches the lab, Appointments can be taken scheduled accordingly. Labs can directly upload the reports and images, to super Dr. thereby saving precious time and making reports available to Doctors and patients simultaneously. Auto updation of EHR records of the patient by the lab or imaging service provider.

Fully integrated Labs & ICU

Complete integration of all Pathology machines like ABC, Biochemistry, Cell Counter as well as ICU Monitors, Ventilators, ECG Machines, of top brands like Vitros, Siemen, GE, etc, gives the Super Dr user a clear distinct benefit of zero TAT & huge savings in cost of operation, and Remote monitoring.

KEY FEATURES

PACS Server / DICOM Viewer

Super Dr offers its own PACs Sever along with a Dicom viewer fully integrated with the system, avoiding the need of expensive XRAY & CT-SCAN printers, toners, ink and the print media, giving you a direct savings of over 20 lakhs. The Integration helps Radiologist and Cardiologists, with Integration of CT Scan, MRI, X-Ray, Cath Labs, Ultrasound etc.

Peer Referrals

Electronic referrals and secure messaging for streamlined collaboration amongst doctors. Secure electronic messaging with staff and network providers also allows for instant collaboration on patient care in real time across all facilities. The referrals will remain in the patient logins forever. You can also attach a chart note directly from your consultation to your peers. Your clinic runs more smoothly and collaborates on patient care with staff, nurses, and other providers with secure messaging.

KEY FEATURES

Notify Authorities

Most of the time intentional notifying to the authorities about a particular epidemic also becomes difficult due to the tedious form fillings and manual mode of communications. Super Dr Offers the perfect solutions, offering an auto generated notify button during your consultation so you have to put no extra effort for the same. Giving you a secured and updated medical practice in harmony with the authorities.

ICD 10: Covid 19 confirmed **U07.1**

The Super Dr incorporated all the ICD Code 10. ICD-10 is the 10th revision of the International Statistical Classification of Diseases and Related Health Problems (ICD), a medical classification list by the World Health Organization (WHO). It contains codes for diseases, signs and symptoms, abnormal findings, complaints, social circumstances, and external causes of injury or diseases

KEY FEATURES

Appointments Calendar

The Daily scheduler is the important part of your desk top and an integrated appointments calendar helps you plan your different Clinic locations effectively without having to worry about how your day is going to be. With an integrated calendar which accepts online as well as offline appointments, it helps you plan things faster and better.

Online Booking

Cut down on phone calls with free online appointment booking Use your Super Dr profile to attract new patients and let current patient's book appointments online. Directly integrated with your EHR schedule, online booking brings in business while saving staff scheduling time.

KEY FEATURES

Registrations and CME points

Registration with a local body or the Medical council is as easy as ever. You can now enroll for a lecture or a CME within the app and acquire points within the app. The Super Dr application gives you the liberty of attending online lectures and securing important updates and having it stored for life time.

Digital Treatment Plans

Digital Treatment plans are part of your daily consultations making certain protocol based treatment for a particular ailment and repeating that for common causes will save time and errors in the fast day to day life. Making life tension free and save you any medicolegal hazards for future. One touch OPD as it is called simply enhances the patient experience as he gets a complete prescription with dos donts etc, without you typing it or missing on an important piece of advice.

KEY FEATURES

Digital Communication

Super Dr Web based software not only gives you ease and beautiful templates for your practice but also completely erases the communication errors. Here the request and the indent are in crystal clear formats so there are no transitional errors. The communications are also timed so that important TATS can be monitored to improve the service delivery from every individual of the organization.

Express Diagnosis

No sooner the lab reports are generated its available to view in Doctors login. This feature saves a lot of time to start an important therapy or decide a treatment line with immediate dos and don'ts. The treatment plan then can be prescribed from any place in the world, saving time and efforts of the treating physician and also starting the important treatment schedule of the patient.

KEY FEATURES

Consents

Super Dr has a by default consent and if the additional consents are needed its available in form of ready templates. Super Dr also offers you to customize your own disclaimer and consent for a safer and efficient practice.

Mis-use of Diagnostic facilities

Its common that ignorant or at times over smart patients tend to take undue advantages of the FREE facilities available at a Govt centre. For example the Sonolgist keeps diagnosing the same patient more than once. Super Dr system implements the checks and balances at the POS saving precious time, resources & money.

KEY FEATURES

Schedule your Day

No more excessive to and fro travelling unplanned visits, the Super Dr Scheduler will give you the exact daily route maps and pre-booked appointments so you save time money and energy and are back home on time to be with your loved ones.

Efficient Customization

The Super Dr offers you a vast range of Templates, and Professors to begin your practice. It also gives you open templates to customize in your own way and you yourself create better templates and can offer us back to be shared with your colleagues and juniors.

NEW FEATURES

1. Updated Queue Management
2. CRM Software
3. Review Management System
4. Social Media Marketing
5. SMS & Whatsapp interfacing
6. Three Click IPD rounds
7. Three Click OPD Consultation
8. Online payment Gateway
9. Quality Markers & Indicators
10. Vendor management

Medical Data (EHR).

The most important aspect of medical treatment? Yes, the patient information, no sooner it's available to an expert, the treatment can be initiated from any part of the world. The Super Dr app promises possibilities to transform the healthcare services going forward. It continues to add value to the immense hard work of the medical staff. The goals are immense, right from prevention, reduction of healthcare costs, smart usage of manpower, Remote monitoring, & saving lives as well as Money. This will benefit both the care provider and the patients.

Secured password protection.

Every data is completely safe and secure and encrypted within the App and the cloud with a dual factor authentication. The company invests a major part providing data security of the highest level. All the stake holders are mandatorily made to adhere to strict security policies.

Detailed one-time Registration process.

The user henceforth will now never have to queue for registering themselves during a repeat visit to the hospital or clinic. The app can give the Hospital / Clinic instant registration every time the patient visits. Once registered, the info will be available in an updated format automatically.

History

Family: All family history will be available to the treating physician in his login.

Medical: The Medical history will be added and updated every time there is a new entry.

Surgical: The Surgical History with pictures of previous surgeries will be available and also updated post the new one.

Allergies cannot be missed ever

Allergies and reaction details of any kind in the past are available in the allergy screen & reminds the Doctors, during consultation or IPD Visits, so the all-important care is taken by the Dr every time he treats you.

Reminders

Medicine reminders:

If notifications are turned on, the App will remind you of the medications to be taken timely with proper instructions every time.

Investigations reminders:

The investigation reminder reminds you of the investigations like the Blood sugar and other routine tests you do on regular basis.

Follow-up reminders:

Follow up reminder not only reminds you of the follow-up with the Dr It also automatically takes an appointment with the Dr and saves you the trouble of calling.

Diet & Exercise reminders:

The app is smartly designed to give you diet and alerts for your daily exercises.

SUPER DR ai
CLINICAL SOFTWARE

i9innovations.com

Appointments & Follow-ups.

Taking a specialist appointments was never this easy, find any doctor for a particular ailment, take appointments within the app, and get reminders about the same.

Cancellations, rescheduling, alerts, are key features, For this busy medical fraternity. the App will give you timely reminders and guide you through your treatment plan in the prescribed manner by your treating physician.

Video Consultancy

Contact-less video consultancy with digital templates providing the much needed social distancing and speed. A video consultation helps reduce almost 50% of unnecessary traffic in the OPD and at the same time generates revenue from the same call which was previously neither possible nor accepted.

Don't miss a single patient now.

Digital Pharmacy indent.

The app is synced with all pharmacies so you have multiple choices of pharmacies instead of one. The transitional errors will no longer haunt you and calling the physicians from the pharmacies will no longer be required. The pharmacy itself will now be able to save all indents with the prescribers name in original. It also gives a reminders for monthly medication there by increasing revenue and creating a loyalty based business model.

Diagnostic & labs.

Diagnostic reports are available instantly on the app. Interfacing of all kinds of diagnostic machines. Sharing important diagnostics reports across the platform and reducing time is a boon to everyone involved, in a real-time. Storage of all Dicom images like X-rays, ultrasound, CT, MRI, and reports in login was never possible before. Super Dr gives you the freedom and security to do so.

E-sharing of Reports.

Patients can now share their investigations and other important reports for multiple opinions anywhere in the world in a jiffy. It will avoid you all the traffic and transportation hazards of the previous era. A quick second opinion can be sort without leaving the hospital premises, thereby increasing faith and wasting no resources on traveling to some other Physician just for an expert second opinion.

Medi-claims Online

The major hassle post-treatment is reimbursements from various organizations such as your Employers, TPA, and the Insurance Company. All your claim forms can be auto-filled if prescribed rightly for reimbursement or Cashless treatment. Soon the Super Dr will have a networking system in place with all the major reimbursing agencies in the world.

Medical certificates.

The Medical certificates is a very important and a key feature for today's HR managements. Its inbuilt templates help the treating physician to generate your Medical certificate along with your Consultation without an extra effort. This can be sent to the desired destination from within the App, & also stored for future references

Drug Diary and Education.

Entire world medicine knowledgebase, with online references and documentations can be easily accessed at the click of a button, for medical and non-medical references. The generic and the brand name with the maker, the batch no for tracing is available to track everything for a safer Healthcare environment.

Do's and Don'ts.

Every time you visit a Doctor there are lot of questions you want to ask, But every time you come back you seem to miss that question about something. You can always ask your Dr to share the Do's and Don'ts templates available on the App for a particular Medical or surgical treatment

Vaccination reminders

This App was especially designed for the Mother and infant care where the parent never misses out on any vaccination, or important aspect of raising a baby. From the first month of pregnancy till the final vaccine all the important markers and reminders are incorporated.

Doctors credentials

All the credentials of your Dr is available for your reference and Medi-claim purposes. From the registration number to the number of years he is been in practice and also the number patients he has treated and the testimonials of his patients. This builds up immediate trust and helps in overall patient Doctor relationship.

Epidemic outburst & Seasonal Alerts

The authorities and health administration will give you alerts on the epidemic spread in your area and also suggest necessary precautions. Prepare you for various seasons. Seasonal alerts will also be provided any health offer by the state can also be found in the app.

Specialty Surgical Centers

You can have the List of Medical centers with their infrastructure listed in a designed manner with facilities and their tariff clearly mentioned, across the world News about various health offers are available globally.

Search ambulance near me

The online Ambulance search locates the nearest ambulance available, with all the info about the various types of ambulances in the city you can actually see the facilities provided in the ambulance while booking it during a transfer or an emergency. Pay online and get e bills for accounts.

Blood Bank Locator

No more sending emotional messages for Blood. If its available anywhere in the city, it will be displayed in the app. One can easily locate the availability of the particular Blood in the nearest Blood bank to the patient at that time and reserve it from the app.

Homecare services (online).

Home care services and many other health care services can be searched and contacted within the app. The search bar gives you choices of every medical facility available in town.

Medical equipments, Buy or rent

Medical devices equipments and instruments available on rent can be searched and indented within the app. If you are lucky enough you can get it free of cost from a user, or if you have an equipment to donate you can give it to an actual deserving person.

Grow with Super Dr
